

XTRAIL is a new generation fleet management ERP solution come of age with over a decade of experience and harnessing the immense capability of the latest technological advancements to streamline the services of a company having either its own fleet or managing a 3rd Party fleet doing one-off or Project work.

The system covers every aspect of fleet management operations including; customer management, vendor management, cost analysis, pricing, project management, vehicle maintenance, fuel station maintenance, garage management, and tyre management with accounting and HR -payroll, incentive, overtime modules.

Xtrail's flexible architecture has allowed easy integration with GPS devices for better cost analysis and performance management, Business Objects for analyzing business revenue, costs and trends and GPRS based handhelds for remote order processing.

Business Challenges

- ▶ Reduce fleet operating costs
- ▶ Improve business efficiency and Customer Service
- ▶ Monitor and Improve business profitability
- ▶ Monitor Driver and Vehicle performance
- ▶ Effectively track and maintain vehicles and records
- ▶ Manage supplier network and transaction processing
- ▶ Reduce administrative and management overheads
- ▶ Ability to track and monitor business from any branch or location
- ▶ Comprehensive reporting and analytics

Xtrail Benefits

- ▶ Effective cost analysis and estimation, pre-filled pricing data and consolidation for Project work
- ▶ Integrated Accounting, document generation and alerts coupled with Handheld devices help manage jobs and orders on the move with real-time GPRS synchronization with base station
- ▶ Periodic analysis of executed orders to track costs and monitor pricing to guarantee profitability
- ▶ Automate and manage payroll, leave planning, overtime and bonuses. Evaluate profitability by Vehicle or Driver
- ▶ Maintain active vehicle records with full history of maintenance, repairs and revenue generation. Integration with GPS Devices help track vehicle movements, performance and driver discipline
- ▶ Maintain supplier records with full inventory, stock replenishment and reorder monitoring
- ▶ Easy to use data capture screens and data consolidation with real-time view of the business position
- ▶ Intranet / Internet based solution allows easy access to Xtrail from anywhere in the world
- ▶ An extensive set of pre-defined reports, user specific dashboard as well as ability to create, modify and distribute own reports and OLAP analysis using integrated Business Objects CASE tool

One of the biggest challenges for a transportation company is keeping a lid on costs. Xtrail has helped us enormously in analyzing our fleet operating costs, planning job schedules and tracking maintenance activities. Xtrail's automation and effective job costing have helped us realize our ROI within 6 months of implementation.

Mr Ali Al Khaja, Chief Executive, Sinyar Logistics
